**YOUR CHOICES FOR A GOOD LIFE
ARE NOT LIMITED TO A FOUR YEAR
COLLEGE EDUCATION**

Many high school graduates will plan to attend a 2 year or 4 year college and work to receive a college degree. This is a very good plan if that is something you personally feel will benefit you in your future career goals. This is not a good plan if you are choosing a college education in order to please someone else and their future goals for you. The upcoming workshops are designed to introduce young people to excellent options to a college degree for successful career goals.

Join men and women who are excited to share with you special demonstrations and information to start you on your way to a successful career.
